Relevant Work.

Skosay

A mobile solution that reflects and celebrates the powerful user experience of their two way feedback channel.

WHAT WE'VE DELIVERED

The Skosay Team wanted a mobile-first solution that gave users access to a simple and actionable feedback channel. Through thoughtful and comprehensive UX, UI, and Front-End efforts, the Solutions Resource team re-imagined the private two way feedback channel product and delivered a responsive card-based web app that offers a seamless experience across devices, bringing customer experience to a whole new level.

Syncdup

Want to shift consumer behavior? Offer them an alternative experience that's so effortless they can't help but use it.

WHAT WE'VE DELIVERED

Syncdup looked to expand their online sales dominance beyond the current strategy. With a focus on Mobile, Solutions Resource delivered multiple options and designs to serve as a proof-of-concept and to test Syncdup's strategy entering the US market.

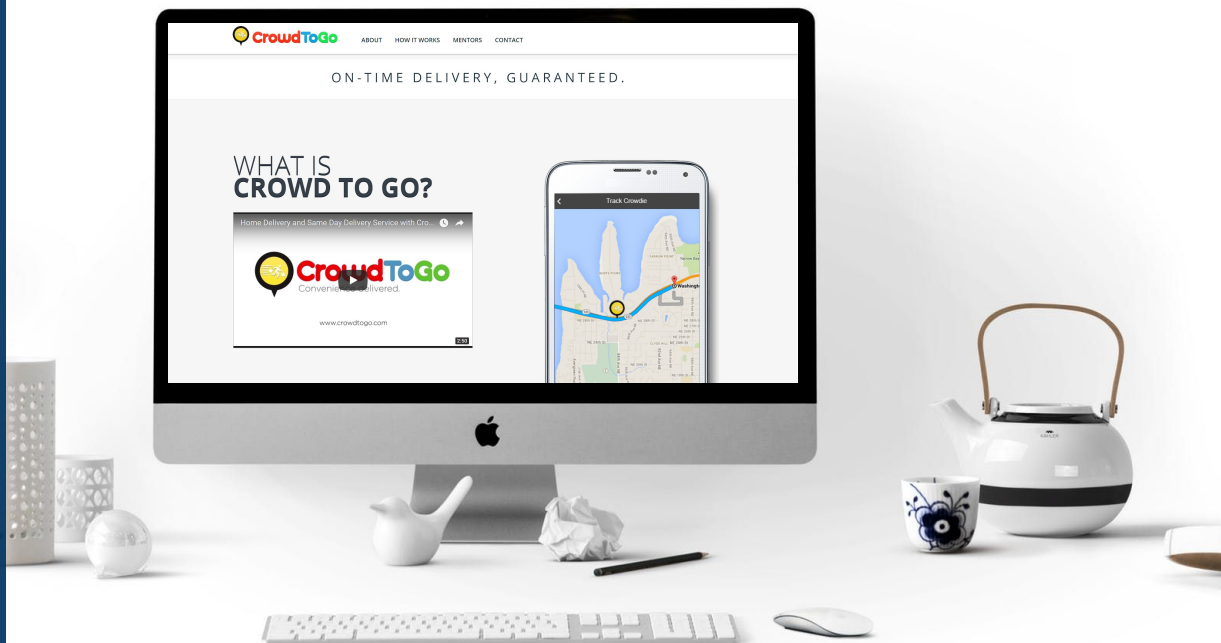

CrowdToGo

Sometimes being able to see yourself accurately requires an outside perspective.

WHAT WE'VE DELIVERED

We work with Crowd-To-Go to help align their internal organization. By visualizing their organization and their process it helps them understand what they need to do to create efficiencies in their organization structure so that they can better serve their customers.

Thank You!
